WALLA WALLA COLLEGE
CALENDAR NUMBER.

W.W.C.

MAY 1902.

SPECIAL NOTICE!

A conveyance from the College will meet all students who arrive at Walla Walla College between September 1 and 5. After September 5, students who desire to be met must notify the College of their arrival. For all OTHER trips, except when the students leave at the close of the school year, a charge of fifty cents will be made for each passenger. The College hack will not be expected to run on Saturday. In no case will transportation be offered to resident students without charge.

WALLA WALLA COLLEGE.

At the twenty-ninth session of the Seventh-day Adventist General Conference held in Battle Creek, Mich., March 5-25, 1891, it was voted to establish a college at Walla Walla, Washington. Since that time a suitable location has been secured, facilities provided, and the institution which has been named Walla Walla College was opened for the reception of students December 7, 1892. The object in establishing the institution is to give a thorough knowledge of Bible truth; to develop evangelistic workers; to furnish a liberal education in the sciences; instruction in the practical industries, in hydrotherapy, treatment of diseases, and in all charitable works.

GENERAL INFORMATION.

LOCATION. The College is located about two and one-half miles from Walla Walla, which is a city of 10,000 inhabitants, situated in the celebrated Walla Walla Valley, a region justly noted for its orchards and gardens. The climate is mild and healthful. Seven splendid mountain streams and countless spring brooks flow through the valley to water its luxuriant vegetation. From these sparkling and musical streams the name "Walla Walla" is derived, meaning "Many Waters."

The College may be reached by three systems of railway—

COLLEGE CALENDAR.

the Oregon Railway & Navigation Co., the Northern Pacific, and the Great Northern.

BUILDINGS AND GROUNDS.

The College building is a substantial structure of brick, four stories in height. Two brick dormitories are connected with it, containing rooms and dining room capacity to accommodate one hundred and fifty students. The rooms are heated by steam and lighted by electricity.

The College campus consists of about ten acres upon elevated grounds, commanding a fine view of the Blue Mountains, which lie to the east and south. The College is also supplied with an abundance of pure spring water, and is in close proximity to orchards and gardens on all sides.

COLLEGE

YEAR.

The College year will open September 3, 1902, and close May 12, 1903. It will consist of three terms of twelve weeks each. No arrangement is made for a vacation between terms. The advantage in this plan is, that the students have one month more to be out of the schoolroom, affording them better opportunities to earn money to pay school expenses.

TIME TO

ENTER.

Much of the student's success in class work depends upon his entering the College at the beginning of the school year and remaining to its close. In the minds of the Faculty a year's consecutive work is of much more value than a longer period when the work is interrupted. Students are therefore urged to plan for a full year's work. Those who find it necessary to enter at other times than the first of the year should notify the College, stating definitely the time of their arrival.

WHO ADMITTED.

The College is open to all worthy persons of both sexes. The moral influence of the school is carefully guarded, and no one who uses profane or unbecoming language, or in-

dulges in the use of tobacco or alcoholic drinks, or who is in any way vicious or immoral, will be admitted.

Candidates for admission who are strangers to the Faculty are requested to produce evidence of good moral character.

**BOARD
AND
ROOM.**

All unmarried students whose parents do not reside at or near College Place, are required to board and room at the College. Students who are absolutely unable to meet the expense of the Home may be permitted, on application to the President of the Faculty, to secure approved places to work for their board; or in case such places cannot be found, students who are known to be perfectly reliable may be permitted to room, under the supervision of approved persons, outside of the Home. All applications for such permission, stating the reasons for the request, must be presented and approved before any such arrangements are made. Failure to comply with these requirements will justify the Faculty in declining to receive such students for classification.

DISCIPLINE.

General regulations adopted by the Board of managers are found on pages 14-16. More specific regulations are made by the Faculty as circumstances require. Students who desire the greatest possible benefit from their school work, and who are willing to submit to reasonable regulations, will find themselves in harmony with the management. The aim of the management is to develop self-reliant, self-controlled men and women; but no provision is made for the reformation of young people who are too incorrigible to be governed at home; and parents are cautioned against sending such to this institution. No student is allowed to remain in the school, who, after fair trial, is unwilling to render cheerful obedience to its requirements, or whose influence is pernicious. This course is necessary to protect the morals of the other students, and maintain the moral standing of the school.

EXAMINATIONS.

Students who have done work in other schools having equal standing with this, will receive credit for their work upon entering the College, by presenting the evidence that such work has been done in a creditable manner. All other students are required upon entering the College to pass examination, either written or oral or both, to ascertain the grade of work which they are capable of doing, and to determine the classes they will be permitted to enter. Each student will be required to take examinations in reading before classification in other studies. A final examination is held in each study whenever it is completed, and more frequent examinations given at the discretion of the instructors. If for any cause there is a failure to take examination at the regular time a fee of fifty cents will be collected for each special examination.

DIPLOMAS.

If desired, Diplomas will be granted to all students who satisfactorily complete any of the regular courses.

NEEDS**OF THE
COLLEGE.**

(1) Contributions to the students' loan fund, from which worthy students may receive financial aid. (2) Funds with which to purchase additional books for the library. (Donations of standard works will be thankfully received. Please correspond with the College before sending contributions.) (3) Specimens for the museum. (Curiosities of any kind will be appreciated.)

**DISTINCTIVE
FEATURES OF****THE COLLEGE.**

A Christian home for non-resident students.

A strong religious influence pervading all the work.

Studied effort made to conduct work in complete harmony with the Bible and Testimonies.

Practical courses to train young people to enter the different lines of our work.

VIEW FROM THE COLLEGE LOOKING TOWARD THE MOUNTAINS.

Special attention paid to healthful living.

A sentiment which enables older students to pursue elementary branches without embarrassment.

Necessary expenses low. Economy and plainness in dress encouraged.

Science work on a basis which strengthens faith in God's Word.

A course in history in which the fulfillment of prophecy is made prominent.

Regular class and chorus drill in vocal music.

Books and stationery are kept for sale in the College.

MISCELLANEOUS. The scholarship of each student is recorded for permanent reference.

A record of scholarship is given to each student after the close of each term, showing the standing in the branches studied. A duplicate is forwarded to parents or guardians.

All mail for the College should be directed to College Place, Walla Walla County, Wash. The word "College" added to the address will facilitate its delivery. Students in the Home are not permitted to have private post-office boxes. Mail is delivered twice each day.

All correspondence relating to the institution should be addressed to Walla Walla College, College Place, Wash.

REGULATIONS,

GOVERNING ALL STUDENTS OF WALLA WALLA COLLEGE DURING THE ENTIRE COLLEGE YEAR.

CONDITIONS. Regular attendance at all College exercises is expected of every student. Realizing, however, that in some cases this is impossible, the Faculty will accept satisfactory reasons for a limited number of absences. All excuses must be presented in writing to the President, or to a member of the Faculty acting in his place, for approval. Students who reside in the village must have the name of one of their parents or guardians signed to their excuses, and those living in the College Home must secure the name of the Preceptor or Preceptress. All absences not satisfactorily explained shall stand as unexcused. When any student shall have two such absences charged against him, he shall be required to appear before the President; and three absences without excuse will be reported to the student's parents or guardians, and the Faculty will deal with such cases. Should the number of absences from any class, whether excused or not, exceed fifteen per cent of the whole number of recitations for the full term, the student forfeits his standing in that class.

No student shall leave any class of any department, except by permission of the Faculty.

Every student is required to pass a satisfactory examination in each study pursued, before entering a succeeding class.

No student shall receive private lessons or engage in teaching, except by permission of the Faculty.

No student will be allowed to take more than four regular studies, unless by special permission of the Faculty, the request and reasons therefor having been previously presented in writing. When the student is granted the privilege of working

more than thirty hours per month, the number of studies carried shall be regulated at the discretion of the Faculty.

Students are expected to maintain a proper degree of reserve in their associations with those of the opposite sex. Gentlemen must not escort ladies on the street or to or from public gatherings.

Gentlemen who wish to call on ladies living outside of the Home must first obtain permission from the President to do so.

Attending parties, theatre, or any entertainment of an objectionable character, interferes with the student's work, and exerts a wrong influence in the school. It is therefore forbidden.

Students desiring to attend any social gathering must first obtain permission from the President.

Frequent attendance upon evening gatherings of any kind is not in harmony with the plan of work at the College, and may be made a matter of discipline at the discretion of the Faculty. Students are permitted, on approval of the Faculty, to attend one such gathering (aside from those planned by the Faculty for the benefit of students) during each of the three terms which constitute a school year. It will be a courtesy on the part of the students toward the Faculty if they do not request further concessions in this line.

Students living outside of the College Home are expected to observe the hours of study as indicated on last page of Calendar.

No student will be allowed to enter or drop any class without first obtaining a voucher from the President.

The Sabbath should be observed by resident students as required on pages 17, 18.

Each student is requested to provide himself with rubbers.

Students are required to refrain from participating in match games of any kind.

Failure to comply with any of the above regulations will subject the student to discipline.

Whenever in the judgement of the Faculty and the Board of Managers a student's attendance is no longer profitable to himself, or is detrimental to the school he may be dismissed.

CHANGING CLASSES. Each student on entering the College is allowed to take up any studies or course, which in the judgement of the Faculty he or she is qualified to carry. Great care should be exercised by the student in selecting his line of work, as it is detrimental to the student as well as to the general class work to change during the term. *No student* will be allowed, except on the payment of a fee of 25 cents, under any ordinary circumstances, to change a line of work he has taken up, at any other time than the last two days of each school month. Opportunities will be given at the beginning of each term to make reasonable changes subject to the action of the Faculty.

THE HOME.

A careful study of the best manner of training students reveals the advantage of a students' Home. Peculiarities of conduct and irregularities of habit will be overcome as students associate together with Christian teachers under well regulated home influences. By this means industrious and studious habits and refined tastes will be inculcated. Special attention will be given to the neatness and order with which room work is done. Christian courtesy and refinement will result from this manner of life.

The managers earnestly recommend that all parents living at a distance who send their sons and daughters to the College make provision for them to live in the Home. The program of the Home is such as can be followed by all without inconvenience, and the requirements are such as are consistent with a spirit of trust and freedom. The work of the Home is largely

done by the students themselves, each one working one hour per day in part payment of his expenses. The work is so planned that when each has performed the amount assigned, the whole work is accomplished in an orderly way. The training thus received in bearing responsibility during the years of school life is extremely valuable both in its present and future results.

Every member of the Home must conform to the daily program arranged by those in charge. All students in the Home must be at home evenings, unless special permission is obtained to the contrary. Ladies may receive gentlemen callers only in the public parlors, and on such days as those in charge may permit. Students may visit the city or other places near College Place only by special permission from the Preceptor or Preceptress. Permission will not be granted in any case to attend parties or social gatherings, unless those arranging for such gatherings previously confer with the President of the Faculty and Managers of the Home.

Each member of the Home family will furnish his own toilet soap, brushes, combs, six towels, four napkins, napkin ring, four pillow cases, four sheets, a bed spread, a pillow, quilts or blankets, two yards of heavy flannel for fomentation cloths in case of sickness, and a hot water bottle, two long work aprons, a sewing outfit, spread for table 30x48 inches, also toilet spreads for dresser and wash stand. Each student must be provided with a pair of noiseless shoes or slippers, to be worn during study hours. Those who come unprovided with these things will be required to purchase them here. All articles to be laundried should be plainly and durably marked with the full name of owner.

Students are expected to deport themselves in such a way on the Sabbath as will be in harmony with the occasion, and attend Sabbath School and public worship. No departure from these regulations will be made except at the discretion of the Preceptors. In case of necessary absence, the student's time should be spent in his private room. Students are not expected

to make or receive calls on the Sabbath, nor should they spend the Sabbath away from the College.

For obvious reasons students are required to attend morning and evening worship. Promptness and regularity must be cultivated in home as well as school duties. Preceptors will keep a daily record of attendance at worship, and require reasonable excuses for absences.

The reading of fiction and other light or immoral literature is contrary to the best interests of the student, and out of harmony with the principles inculcated by the teachers of this institution; consequently, young people should refrain from bringing such literature with them, and patrons of the College should not supply their children with this class of reading matter.

Regularity in diet is urged upon all students. It is the object of the school to set before the students such articles of food as will be conducive to good health. Parents are requested not to send boxes of food to their children. Only a light lunch composed of such articles of diet as are ordinarily supplied by the College will be allowed in the evening. Any variation from this must be by permission of those in charge of the Home.

The years which a young girl spends in school are those in which good physical habits should be so confirmed as to become necessary to comfort. It is urged that the clothing be in harmony with the necessities of good physical development. The preceptress will insist on a change of dress whenever that worn is judged by her to be a hindrance to the best health. Clothing should be as light as is consistent with warmth, and evenly distributed; all skirts hung from a waist so loosely worn that the arms can reach straight up with perfect ease; sleeves to admit the freest movement. No corset should be worn with any suit. The shoes worn should have low heels. All students are expected to dress plainly. The wearing of jewelry and any unnecessary ornamentation in dress is not in good taste here, and will not be in harmony with the wishes of the Managers.

EXPENSES.

The charge for College Home students will be \$18.00 per month of four weeks, payable cash in advance. This will include board, room rent, and College Home privileges; such as heat, light, plain washing, a limited amount of ironing, baths, admission fee, use of library, and tuition in regular courses of study. This price is based upon the supposition that two students occupy one room, and that two meals per day are furnished. Any change from this plan will necessitate an increase in the charges made. No deductions from the regular charges will be made for a short absence.

Thirty hours' work during each school month is provided for each "Home" student of sufficient age and ability. When this work is done acceptably, the student will be allowed ten cents per hour (sixty minutes).

No student will be allowed to work, at College expense, more than thirty hours per school month, except by special arrangement with the Business Manager, who will adjust the value of the labor performed.

**TUITION
ACQUIRED
BY LABOR.**

In some instances, students who have not sufficient money to defray their expenses at the College are given employment on the College farm, or in some industrial department connected with the Institution. Thus a considerable number are assisted by the College management in their efforts to secure an education. Concerning the employment of such help, the College Board has found it necessary to establish the following regulations: That where contracts are made with students to labor for tuition, if individuals thus earning tuition find it impossible to attend the College, the Board will not obligate itself to redeem in cash, such tuition; *nor is it transferable, except by special arrangement with the College Board.* If the

College in any instance redeems such tuition in cash, it must be at a liberal discount on the part of the holder.

The charges for Board, Room, and Tuition, are so low that the College will be unable to meet extra expenses incurred on account of illness of students. In such cases the actual cost of providing a physician or nurse, and five cents extra for each meal sent to the room, will be charged to the students' account.

In most cases it will be better for parents to send money directly to the College, and not to their children. In doing so, draw all drafts, checks, orders, etc., in favor of "Walla Walla College." Students need but little spending money, and parents are urged to require a monthly statement of expenses from their children. In order that students may draw money on their account from the Business Office for incidental expenses, an order from their parents will be required.

It is expected that all students will have respect for College property; and in case of destruction of property of any kind, such as breaking windows, dishes, apparatus used in laboratory, tools, etc., the actual cost of replacing the same will be charged, if those doing damage report it at the Business Office within twenty-four hours after the damage is done. If it is not thus reported, and those in charge are compelled to find the person who did the damage, twice the amount of the actual cost will be charged.

In making bills to resident students, the time will be reckoned from the first or middle of each school month in which the student enters. If the student withdraws during the first half of a school month, he will be charged to the middle of the month. If he withdraws at any time after the middle of the month, he will be charged to the end of the month.

The payment of an incidental fee of fifty cents will be required from all resident students; this will be used in the support of the library.

DISCOUNTS. The above discounts are calculated on the basis of five per cent for three months, seven and one-half per cent for six months, and ten per cent for nine months.

The Gospel, embracing the Epistles of Paul; The Prophecies, especially those of Daniel and Revelation, Isaiah, Jeremiah, and Ezekiel; and a critical study of the principles of Present Truth. All Bible study is closely connected with that of the history of the times in which the Bible was written, and especially of those portions which show the fulfillment of prophecy, and record events connected with sacred history.

**MUSIC
AND ART
TUITION.** The tuition for music is separate and distinct from all other charges. The charge for instrumental music (piano or organ) is \$2.00 per month; sacred music \$1.25. Instruments may be had for the required time to practice, at \$1.00 per month for piano, and fifty cents for organ. A charge of \$1.00 per term of twenty lessons will be made for vocal music. Voice Culture, in classes of four, \$6.00 per term. Private lessons \$8.00 per term. The charges for lessons in art will be the same as for instrumental music, \$2.00 per month.

**SCHOOL
MONTH.** Four weeks, or twenty eight days, constitute a school month. All charges will be made on this basis.

DEPARTMENTS OF INSTRUCTION.

ENGLISH BIBLE.

The Bible stands highest among books, and is the best educational agency in the world. In the Scriptures are to be found the fundamental principles of true science, by which alone it is possible to reach right conclusions in any department of study. The Bible therefore is given a leading place throughout the entire College.

The Bible study is so arranged as to give special advantages to all who aim to prepare for any department of Gospel work. Beginning with the eighth grade, Bible study continues throughout the Collegiate courses, covering a period of six years. Daily study of the Bible is also conducted in all grades below the eighth.

Some of the special features embraced in our course of Bible study are, The Life of Christ, covering the four gospels of Matthew, Mark, Luke, and John; The Gospel in the Old Testament with "Patriarchs and Prophets" as a basic study; The Gospel, embracing the Epistles of Paul; The Prophecies, especially those of Daniel and Revelation, Isaiah, Jeremiah, and Ezekiel; and a critical study of the principles of Present Truth. All Bible study is closely connected with that of the history of the times in which the Bible was written, and especially of those portions which show the fulfillment of prophecy, and record events connected with sacred history.

HISTORY.

The large element of history in the Bible not only furnishes proof of the importance of the subject, but forms a basis for the perusal of this branch of knowledge. Considered thus

in the light of God's word, history becomes one of the most serviceable and helpful of studies; and when rightly understood, a great factor in true missionary labor.

The Bible tells us that its great Author hath made of one blood all the nations to dwell on all the face of the earth; and hath determined their times and bounds. With a few master strokes the pen of inspiration outlines the rise, progress, and actuating principles of the great governments of the world from the beginning of time to the end, in relation to God's people. Of these underlying principles, history should be but an amplification.

Our three year's course will cover the entire period of history beginning with the origin of nations, and our chief object in the pursuance of this study will be to develop and illustrate the particular phases that will best enable the student to see the accomplishment of God's purpose in the affairs of men, and so rightly to interpret the meaning of present events.

NATURAL SCIENCE.

"While the Bible should hold the first place in the education of children and youth, the book of nature is next in importance. God's created works testify to his love and power."

The study of nature furnishes an ever-present and constantly enlarging book, which if properly examined, is daily revealing to us new beauties of its Author. "Science contributes fresh evidence of the wisdom and power of God." Rightly understood, science and the written Word agree, and each sheds light on the other. Together, they lead us to God, by teaching us something of the wise and beneficial laws through which he works. "But cold, philosophical speculation, and scientific research in which God is not acknowledged, are a positive injury," and will therefore find no place in the science classes.

Those who are preparing to do active work for the Lord will find in the study of nature a prolific field of illustrations to

teach the truth of the printed word, while those who will have any part in molding the characters of the young cannot discharge their duty without some knowledge of the book of nature. In all the work the student will be taught how to observe, so that he will be prepared to continue the work when he comes in contact with the various scenes in nature.

Elementary Physics, in connection with Arithmetic and a few principles of Algebra, will constitute two terms work. Special attention will be given to heat, light, and electricity. Advanced Physics in connection with Higher Mathematics will be continued in the senior year.

Physical Geography will comprehend the study of the earth from creation to the resurrection. The effects of sin and the influence of the flood on the condition of the earth will be studied, in the light of God's revelation.

A study of the solar system and the starry heavens will follow Physical Geography. Uranography will be carefully studied, so that each student will become as familiar with the map of the heavens as he should be with the map of his native country.

In Zoology a few typical forms will be carefully studied. Microscopical work will be taken as far as the laboratory accomodations will permit.

The work in Botany will begin in the middle of the Winter Term and will be completed in the Spring Term.

"A practical knowledge of the science of human life is necessary in order to glorify God in our bodies." The human body is the masterpiece of God's workmanship, therefore "every part of the wonderful mechanism should be carefully studied." A year's work will be furnished in Anatomy, Physiology, and Hygiene. In each class special attention will be given to the care of the system both in health and disease, so that the student may be able properly to care for his own body, also to give an intelligent helping hand to others under ordinary circumstances.

The College offers excellent opportunities for practical laboratory work in chemistry. Besides Inorganic Chemistry, opportunity will be given to do some work in Organic and Physiological Chemistry. Chemical reactions furnish many very forcible object lessons by which to impress spiritual truths. This feature of the work will receive special attention.

ENGLISH LANGUAGE AND LITERATURE.

The College offers a course in English complete enough to give the student the mastery of the English Language.

The study of English Grammar is completed in the eighth grade. Careful attention is given to grammatical composition, and analysis and parsing of sentences.

The work in Advanced English comprises a study of etymology, history of the English Language, figures of speech, false syntax, diction, punctuation, and composition and letter writing.

The study of Rhetoric, Composition, and Punctuation continues one year. A knowledge of these branches enables the student to interpret English Literature intelligently and systematically, and also furnishes him with a standard by which to test his own writing.

One year is devoted to the study of American and English Literature. A careful study is made of the literary productions of leading American authors, and a few of the best English authors are studied in a way that will enable the student to appreciate and admire the good in literature, as well as to criticise and condemn the bad. Throughout this study, much time is given to the writing and careful correction of essays, abstracts, criticisms, and biographical sketches, under the guidance of the teacher.

A knowledge of the branches here outlined forms an essential part of a thoroughly practical education, capable of unfolding and maturing the mental powers of the student.

MATHEMATICS.

The importance of a thoroughly built foundation in all school work is realized in the endeavor to make the preparatory work in this course as thorough and practical as possible. In connection with the ordinary Arithmetic work, it will be the constant effort to introduce all kinds of problems and examples illustrating the different facts and phenomena in nature, thus promoting an accurate knowledge of these truths, and a habit of careful and assiduous observation.

The work in Algebra includes simple and quadratic equations, theory and use of exponents, the progressions, theory of equations of the quadratic form, and logarithms. Special attention is given to all reasoning processes.

Plane, Solid, and Spherical Geometry is supplemented by a short course in Conics. During this course careful attention is given to the solution of original problems, and a development of close and independent reasoning.

The class work in College Algebra covers the subjects of choice, chance, series, determinants, and the general properties of the equation. Special attention is given to the study of logarithms, their principles, and the logarithmic tables, in order to give a thorough preparation for the following work in mathematics.

It is the purpose to make the course in Plain and Spherical Trigonometry as highly practical as possible. The time will be largely devoted to the functions and their relations, practice in the use of logarithmic tables, and actual out-door work.

The work in Astronomy that is classified in this department is composed of a study of the locations and the real and apparent motions of the heavenly bodies, taken up from a mathematical point of view and applied to practical questions of life.

In the course in Analytic Geometry there are special discussions of conic sections and higher plane curves, by both the rectilinear and polar system of co-ordinates. A careful consid-

eration is also given to loci of the second order. The Differential and Integral Calculus, based on the theory of rates, is carried through the evaluation of indeterminate forms, maxima and minima, curvature, rectification of curves, and curve tracing by means of the Calculus.

It is believed that such a consideration of the most important application of mathematics as is offered will give the student a clear idea of its meaning as a factor in human progress; that it affords an intellectual drill which will cultivate in the student the power of assiduous and logical reasoning, and stimulate him to careful, original, and independent thought.

LANGUAGES, MODERN AND CLASSIC.

The work in these lines may be considered brief; but it is the purpose to make it thorough, and as practical as it is efficient.

All agree that the English student should be well acquainted with his own tongue; and when we consider the parentage of our language it is easily seen that a knowledge of the classics is perhaps second to few things in furnishing a deep insight into its practical use, and also the philosophy of its construction.

The work, as may be seen by a reference to the Outline of the Courses, is made largely elective within the limits of the languages themselves.

In the Literary course six years are required. During the first year's work in Latin, First Lessons in Latin by Jones, a highly recommended work, is used.

The text used in other years may be ascertained by reference to the table of text books and books of reference. In the Modern Languages, Spanish and German will be offered.

MUSIC.

"It is a good thing to give thanks unto the Lord, and to sing praises unto thy name, O Most High: to show forth thy loving kindness in the morning, and thy faithfulness every night, upon an instrument of ten strings, and upon the psaltery: upon the harp with a solemn sound."

The "sweet singer of Israel" delighted to mingle with his prayer to God the music of his voice, and the harmony of instruments. In the schools of the prophets, where the mind of God directed the course of study, music was one of the important branches taught. So, at the present time, while the world is teeming with a perverted form of this beautiful method of expression, God would have his people skilful in music. Music will not only lift the heart of the performer nearer to the Creator of the universe, but will sound the goodness and mercy of God to those who listen. We would that every laborer whether in ministerial, medical, or any other line of our work might have a true appreciation of music, and at least in a simple way, be able to use it as a means of winning souls to Christ. Students in all our departments of missionary training are encouraged to study Sacred Music, both instrumental and vocal. Three main lines of work are represented in this department: Sacred, Instrumental, and Voice Culture.

SACRED MUSIC.

This line will begin with Landon's Reed Organ Method. Two private lessons per week are given to beginners for the first term, and from the second term and onward one private lesson will be given each week, and one class lesson. The work in class will consist of a thorough study of the rudiments of music, introducing elements of harmony at the latter part of the year.

The second year's work comprises the best modern methods in Church music, and the primary Elements of Harmony, which is taught in class.

In the third year's work, voluntaries will be taken up, with the easier selections from the oratorios. History of music is also studied. At least two recitation periods (eighty minutes) per day must be spent in practice on the organ. As soon as competent, each student will be required to play in public as much as can be arranged for. This will give ease and confidence. When a student has become proficient in this line, he will be given a certificate showing that the course has been completed.

INSTRUMENTAL MUSIC.

The aim is to give a thorough musical education both in the technique and the ethics of the art; and to this end only *standard* text books and studies will be used, including the works of Heller, Chopin, Loeschhorn, Duverney, Cramer, Bach, Clementi, Czerny, etc. Harmony and theory of music are branches taught in this department.

Special attention is given to those who are desirous of preparing themselves to become teachers, that they may labor intelligently and efficiently.

The terms for lessons are six dollars a quarter of twelve lessons, organ or piano.

VOICE CULTURE.

Natural breathing, economy and control of the breath, tone qualities, and the placing of the voice, will be treated. "The proper training of the voice is an important feature in education and should not be neglected. Singing, as a part of religious service, is as much an act of worship as is prayer."

Every one studying for the ministry, or public speaking should take a course in Voice Culture. The more naturally we sing, the greater the necessity of learning how to control the breath.

NOTATION and SIGHT-READING will be taught in class, and every student in the College should attend this class. There will be three terms of twenty lessons each at one dollar

per term, but free to all studying Piano, Organ, and Voice Culture, and they are expected to attend it.

ART.

The utility of art study is an important feature of education. Drawing, the first essential, is truly a language; and to use it as a means of expression implies that we must know how to represent. This comes only through the right kind of technical training; for, like all other subjects, it must be learned. Thus Art becomes something more than the desultory copying of a few drawings. Working from common objects and nature gives a new inspiration, and we see "beauty everywhere."

The first year's work includes drawing in pencil, charcoal, crayon, pen and ink, and free hand drawing in water-colors.

A thorough knowledge of the principles of drawing will be required before advanced work is taken. As soon as qualified, the student may choose his own medium.

MINISTERIAL DEPARTMENT.

We know we speak the truth when we say that every person upon whom the Lord has laid the burden to enter the ministry to proclaim this message to the people, has longed for a short course in practical training before going before the people to present the truth; but to them, time seemed so short and the work so great that they could not think of spending year after year in school before entering the work. There have been those who have entered some of our schools with a burden for the work, but their education has been drawn out to such a length that they have lost their ardor for the work, and have been lost to the cause. This certainly is not in harmony with God's will.

Christ had the disciples with him about a year before he

sent them out to preach; and then they would return and tell all things that the Lord had done with them, and receive further instruction. Now we know it is the Lord's will for our schools to prepare to give a short practical training to those whom he has burdened to enter the work. This is what the Walla Walla College proposes to do. We propose to offer sufficient instruction in one or two years to help any one, who is otherwise qualified, to present the message clearly. When a young man has been out in the field and gained more experience in actual work, he can return and study those points wherein he is deficient, and by this means in a short time he can develop into a competent worker.

The whole aim and object of this department shall constantly be to prepare young men to "preach the word." If ever there was a time when the cause of God needed men who can be relied upon in a crisis, it is now.

To all who should attend this department we say: "Come and let us study God's word together, and let the Holy Spirit guide us into all truth, and prepare us just as quick as possible to carry the last message of mercy to a dying world."

COMMERCIAL DEPARTMENT.

BUSINESS COURSE.

ARITHMETIC	LETTER WRITING	SINGLE ENTRY
WRITING	RAPID CALCULATION	BOOKKEEPING
SPELLING	DOUBLE ENTRY	COMMERCIAL LAW
ENGLISH	BOOKKEEPING	BANKING
	OFFICE PRACTICE	

The above work is arranged in such a manner as to constitute a one year's course, bookkeeping being the principal study. In this branch two terms will be given in Theory and Practice, and the third term in Inter-communication Business.

What is meant by Inter-communication business might be explained thus: Our school is in correspondence with four

to six other schools doing similar work with ours. Each school has a number of offices, as a Wholesale House, Bank, Railroad, etc. Students are furnished a directory of the schools forming the circle, and an outlined plan of communication is carried on in which they buy, sell, and exchange commodities, thus bringing into use all the different kinds of commercial paper, and furnishing an excellent drill in letter writing.

Students also get a thorough drill in legal papers, such as Deeds, Mortgages, Leases, Powers of Attorney, Assignments, etc.

Those completing this course should be able to do creditable work in our institutions or any commercial enterprise.

SHORTHAND COURSE.

SHORTHAND	LETTER COPYING	ENGLISH
TYPEWRITING	LEGAL FORMS	WRITING
MANIFOLDING	CORRESPONDENCE	SPELLING
	OFFICE WORK	

By comparing the work given in this course with that offered by any regular Business College, it will be seen that it is essentially the same.

Shorthand is as easy to learn as the common branches of study, and can be acquired by any person who has a good English education. It is not a difficult study, but it requires patience and perseverance to write accurately and rapidly.

There is a demand for capable stenographers, and those who are well qualified need never fail to find employment.

A thorough course of instruction is given in typewriting. We use the Remington and Smith-Premier machines.

MEDICAL MISSIONARY DEPARTMENT.

One of the greatest needs in connection with the promulgation of the truth for these times is medical missionaries and

COLLEGE CALENDAR.

36

trained nurses. There is such a strong current in this direction, that from 800 to 1000 students are in constant training in the various sanitariums operated by the Seventh-day Adventists. Walla Walla College is now prepared to give students an opportunity to take a one year's preparatory course. To facilitate the work and make it as thoroughly practical as possible, treatment rooms have been fitted up in the College building, also physician's offices, well equipped with surgical instruments, electrical appliances, and throat and lung apparatus for the treatment of nasal catarrh, bronchial and lung trouble, etc. Opportunities to attend surgical operations will be given to the students, affording them an experience in surgical nursing, and making them acquainted with the technique of operating-room procedure.

This department is in charge of a regularly graduated physician from the Battle Creek Sanitarium, who is also a registered physician of the state of Washington. He is assisted by a lady nurse in such work as necessitates a lady instructor.

This important addition to our College offers not only an education in medical missionary lines, but also affords favorable opportunity for all students to take treatment for the many maladies to which flesh is heir. Hence parents may feel free from anxiety in sending their children to a College where, in case of sickness, a conscientious physician will immediately take them in charge.

Not only is there great demand for medical missionaries and trained nurses, but it is very desirable that ministers, Bible workers, church school teachers, and canvassers, should know how to treat the sick by rational methods: it increases their efficiency and adds materially to their sphere of usefulness. To meet this demand, classes in various lines taken up in the Medical Missionary Department have been made part of the Normal, Ministerial, and Christian Worker's course.

The course is intended to prepare thorough workers as medical missionaries, and to give nurses a good foundation for their chosen calling. Arrangements have been made with

the Sanitariums whereby students who have finished the Medical Missionary course in the College will be received on recommendation from the College Faculty. When thus admitted to the nurses' classes in the Sanitariums they will be given credit for satisfactory work done in the College.

For the benefit of those who may wish to understand how to apply hygienic remedies in their own families and communities, a short course in simple treatments is provided; and parents would do well to avail themselves of the advantages of this class.

NORMAL DEPARTMENT.

This work has been planned that qualified teachers may be prepared for the church schools.

The course consists of two years, and is nearly parallel with the scientific course in the preparatory and freshman years. These two years furnish work very essential to the teacher. In the last year special attention will be given to mental science and methods of teaching.

This course is to be recommended to those who at the time cannot remain in school long enough to complete a liberal course, and yet have it in mind, after some experience has been gained in teaching, to return and complete the scientific or literary course.

DOMESTIC AND INDUSTRIAL DEPARTMENT.

It is well known that physical labor, cheerfully and faithfully performed, is conducive to both physical and moral health. In view of this, the work of the home is so arranged that each student may have a part in it. Instruction will be given in cooking, caring for kitchen, dining room, parlor, bedroom, etc. Promptness, regularity, and good deportment will be ex-

pected in this department the same as in regular class work. This applies not only to the home work but to the outside work as well.

We believe practical knowledge stands second to none; and it is our desire to supply the students with labor, so that all may have educational advantages in this line, both practical and scientific.

Instruction will be given in agriculture, so that the young men may have experience in this branch; while the young ladies will be taught in the various kinds of work pertaining to the home. We expect to furnish a limited amount of work to such students as are not prepared to meet their total expenses in the College Home. Greater efforts will be put forth in this direction than heretofore, and work which has been given to mechanics, such as improvements and repairs, hereafter will be given to students.

We have erected, near the College, a commodious building which is used for shops. In it we have a broom factory, and carpenter shop.

The College steam printing office is now well equipped and running at its full capacity, thus enabling us to do all our own work in this line. **THE WORKER'S EDUCATOR**, including this calender number, represents the work done in this department.

Our Health Food Plant is now doing a satisfactory business. We expect to make the bakery a means of education as far as possible.

Plans have been formulated by the College Board looking toward the establishment of the following additional industries: viz, Horticulture, Floriculture, Bee Culture, Poultry Raising, Dairying, Carpentry, Blacksmithing, and Dress Making. In order to give permanence and stability to these branches of education, members of the Faculty will in most cases, have charge of the same, and give instruction. These industries are introduced for the two-fold purpose of teaching the student useful avocations of self-supporting labor, and assisting him in

FRUIT SCENE NEAR THE COLLEGE.

defraying his expenses at College. One of the essential qualifications of the missionary is to be able to perform various kinds of useful labor in an acceptable manner, and to instruct others also.

Each student of the industrial department will be expected to bring with him, or purchase here, a few tools which he will use in his line of work. The cost of these tools will not exceed two dollars and fifty cents. We shall be glad to correspond with those wishing an education who have not the funds at their command, but are able to do physical work. These individuals must have the following qualifications: (1) good health; (2) natural intelligence and capacity to learn; (3) candidates must be able to furnish good recommendations as to moral character and industry; (4) should not be younger than eighteen. Such will be received on trial, and those not coming up to the required standard will be advised to discontinue. These advantages are not offered to young men only, but to young ladies as well.

SPECIAL COURSE FOR CHRISTIAN WORKERS.

In view of the urgent demand for a short, yet thorough course, by a large number of our Christian workers, the College has taken steps to arrange such a line of work for those who can not spend more than six months in school each year. It is designed to incorporate in this line of special work the fundamental truths and teachings of the denomination, the common branches of study, selecting those which are the most beneficial to this class of workers; also the study of the simpler subjects of Hygiene. Those following different lines of field work will have the benefit of special instruction along these lines.

A full announcement of this special course will be placed in the hands of our people at an early date. This course is especially intended for those who can spend but a short time in school such as Bible workers, ministers, and those engaged in the sale of subscription books.

REGULAR COURSES.

SCIENTIFIC COURSE.

PREPARATORY YEAR.

Fall Term: Bible, Bookkeeping, Physics, Advanced English.

Winter Term: Bible, Bookkeeping, Physics, Advanced English.

Spring Term: Bible, Physical Geography, Commercial Law, Advanced English.

FRESHMAN YEAR.

Fall Term: Bible and History I, Algebra, Rhetoric, Physiology, Drawing.

Winter Term: Bible and History I, Algebra, Rhetoric, Physiology, Drawing.

SOPHOMORE YEAR.

Fall Term: Bible and History II, American Literature, Zoology, Geometry.

Winter Term: Bible and History II, English Literature, Zoology $\frac{1}{2}$, Botany $\frac{1}{2}$, Geometry.

Spring Term: Bible and History II, English Literature, Botany, Geometry.

JUNIOR YEAR.

Fall Term: Bible and History III, Modern Language, Elementary Astronomy, College Algebra.

Winter Term: Bible and History III, Modern Language, Chemistry, College Algebra, Trigonometry.

Spring Term: Bible and History III, Modern Language, Chemistry, Trigonometry.

SENIOR YEAR.

Fall Term: Public Speaking, Modern Language, Advanced Physics, *General Geometry, *Logic.

Winter Term: Public Speaking, Modern Language, Advanced Physics, *General Geometry and Calculus, *Mental Science.

Spring Term: Public Speaking, Modern Language, General Astronomy, *Calculus, *Moral Science.

COMMERCIAL COURSE.

Fall Term: Bookkeeping, Commercial Arithmetic, Rapid Calculation, English, Spelling and Penmanship.

Winter Term: Bookkeeping, Commercial Arithmetic, Rapid Calculation, English, Commercial Law, Spelling and Penmanship.

Spring Term: Bookkeeping, Commercial Arithmetic, Rapid Calculation, English, Office Work, Spelling and Penmanship.

* †Only one will be required and taught during any one year.

LITERARY COURSE.

FIRST YEAR PREPARATORY. 9

Fall Term: Bible, Bookkeeping, Physics, Advanced English.

Winter Term: Bible, Bookkeeping, Physics, Advanced English.

Spring Term: Bible, Bookkeeping, Physical Geography, Commercial Law.

SECOND YEAR PREPARATORY. 10

Fall Term: Bible and History I, Algebra, Rhetoric, Physiology, Drawing.

Winter Term: Bible and History I, Algebra, Rhetoric, Physiology, Drawing.

Spring Term: Bible and History I, Algebra, Rhetoric, Physiology, Drawing.

FRESHMAN YEAR. 11

Fall Term: Bible and History II, Zoology, Geometry, Language, Modern or Classical.

Winter Term: Bible and History II, Zoology $\frac{1}{2}$, Botany $\frac{1}{2}$, Geometry, Language, Modern or Classical.

Spring Term: Bible and History II, Language, Modern or Classical, Geometry.

SOPHOMORE YEAR. 12

Fall Term: Bible and History III, Language, Modern or Classical, Elementary Astronomy, College Algebra.

Winter Term: Bible and History III, Language, Modern or Classical, Chemistry, College Algebra, Trigonometry.

Spring Term: Bible and History III, Language, Modern or Classical, Chemistry, Trigonometry.

JUNIOR YEAR. 13

Fall Term: Advanced Physics, Language, Modern, Classical, American Literature.

Winter Term: Advanced Physics, Language, Modern, Classical, English Literature.

Spring Term: Language, Modern, Classical, General Astronomy, English Literature.

SENIOR YEAR. 14

Fall Term: Language, Modern, Classical, Public Speaking, *General Geometry or Logic.

Fall Term: History, Algebra, Rhetoric, Bookkeeping, Nature Study.

Winter Term: History, Algebra, Rhetoric, Bookkeeping, Nature Study.

Spring Term: Prophetic History, Rhetoric, Mental Science, Theory of Teaching, Drill.

†BIBLICAL COURSE.

FIRST YEAR.

Bible, History I, Physiology, Advanced English.

SECOND YEAR.

Bible, History II, Public Speaking, Rhetoric.

OUTLINE OF STUDY FOR THE GRADES.

FIRST GRADE.

Bible—See Fourth Grade

Nature—Correlate with Bible.

Reading—Franklin Primer and First Reader, supplemented with "Best Stories from the Best Book."

Numbers—Read and write to 100. Wentworth's Primary, pp. 1-48.

Language—Combined with reading.

*Students who take any of the Special Courses are required to have completed the first eight grades as outlined in this Calendar. In all but the Normal Course the eighth grade in arithmetic will be excepted.

†The Biblical Course covers what has heretofore been known as Ministerial Course and is intended for Ministers, Bible Workers, etc.

THIRD YEAR.

Fall Term: Bookkeeping, Bible, Public Speaking, Elementary Astronomy.

Winter Term: Bookkeeping, Bible, Public Speaking, Hydrotherapy.

Spring Term: Bible, Public Speaking, Botany, Diseases and Treatments.

MEDICAL MISSIONARY OR NURSES' COURSE.

Fall Term: Anatomy, 60 hours.

{ Practical Nursing, 30 hours.

{ Massage, 30 hours.

Bible, 60 hours.

{ Hydrotherapy, 45 hours.

{ Obstetrics, 15 hours. For the ladies.

Bathroom Work (Drill), 60 hours.

Winter Term: Physiology, 60 hours.

{ Surgical Nursing, 45 hours.

{ Bandaging, 15 hours.

{ Diseases of Women, 30 hours. For the ladies.

{ Diseases of Men, 15 hours. For the gentlemen.

{ Diseases of Children, 15 hours.

Bible, 60 hours.

Bathroom Work (Drill), 60 hours.

Spring Term: Hygiene, 60 hours.

Diseases and their Treatment, including Clinics, 60 hours.

Bible, 60 hours.

{ Operating Room Drill, 15 hours.

{ Electricity, 15 hours.

{ Chemistry, 15 hours.

{ Accidents and Emergencies, 15 hrs.

Cooking, 50 hours.

Bathroom Work (Drill), 60 hours.

SECOND GRADE.

Bible—See Fourth Grade.

Nature—Correlate with Bible.

Reading—Franklin Second Reader with supplementary work.

Numbers—Wentworth's Primary, pp. 49-116.

Language—combined with reading. Drills.

COLLEGE CALENDAR.

THIRD GRADE.

Bible—See fourth Grade.
 Nature—Correlate with Bible.
 Reading—Murche's Science Reader, No. 1, with supplementary work.
 Numbers—Wentworth's Primary, pp. 117-197. Multiplication Tables.
 Language—with or without text. Easy composition.
 Drills.

FOURTH GRADE.

Bible—First four grades combined. Creation to Solomon, alternating yearly with Life of Christ.
 Nature—Correlate with Bible.
 Reading—Murche's Science Reader, No. II, Montgomery's Beginnings of American History, supplementary work.
 Arithmetic—Wentworth's Grammar School, pp. 1-154, omitting Decimals, Sutherland's Mental.
 Language—with text. Composition.
 Geography—Harper's Primary.
 Drills.

FIFTH GRADE.

Bible—History of the Children of Israel from Moses to Solomon.
 Arithmetic—Robinson's Complete Arithmetic to denominate numbers.
 Language—Bell's No. II. First half of book.
 Geography—Harper's Introductory.
 Drills—Reading, Spelling.

SIXTH GRADE.

Bible—From Solomon to Daniel.
 Arithmetic—Decimals to percentage. Mental Arithmetic drill.
 Language—Bell's No. II. Last half of book, and review.
 Geography—Harper's Advanced, first half of book.
 Science—Physiology, Kellogg's No. I.

SEVENTH GRADE.

Bible—Life of Christ.
 Arithmetic—Mental Arithmetic, Robinson's complete finished.
 Language—Bell's No. III.
 Geography—Harper's Advanced finished.
 Science—Physiology, Kellogg's No. II.

EIGHTH GRADE.

Bible—Acts.
 Arithmetic—Commercial.
 Language—Bell's No. III.
 History—United States History and Civil Government.
 Drills.

NOTE.

Opportunity is offered for matriculation and consultation August 31, and September 1 and 2.
