What We Have Done!

We have placed an artistic Shoe within reach of all--and a shoe that is more than artistic in appearance--it is artistic in its touch. No shoe ever fitted like

Queen Beauty'

A beautiful, serviceable, up to date shoe, and so easy! Comfort from the first minute and the most graceful lines ever put into a woman's shoe.

All Styles

House, Dress, Street, \$9.50
* and Oxfords. \$2.50

Monks

McKean's,

Walla Walla Wash.,

Cor. 4th & Main Sts.

Chicago Department Store,

Post Office Block, Second Street, Walla Walla, Wash.

This is the place you hear about. Our greatest aim is to give entire satisfaction with each article purchased of us.

W stands for the worth of the famous Walk-Over Shoes.

A is for our anxiety to please you.

L for longing to have others know of this shoe's merits.

K is the kindness you have for us when you wear this shoe.

O means others are wearing them. Not you alone.

V verifies the facts we have stated.

E is for the effort made on our part to please you.

R stands for the right you have to wear Walk-Over Shoes.

S for the satisfaction this shoe gives its wearers.

H is for honesty in manufacture.

O completes the circle of satisfaction.

Each pair sold means another friend gained.

S is for smiling faces of each contented wearer.

We cordially extend an invitation to call and see us. Admission more than free. We pay you for coming.

THE WORKER'S EDUCATOR.

Published in the interests of Walla Walla College.

JUNE, 1902.

NO. 9.

VOL. 3.

ON page 41 of the last Calendar No. of the WORKER'S EDUCATOR, a brief description is given of a special course for Christian Workers, and the promise is made that a full announcement of this course will be placed in the hands of our people at an early date. This promise, together with the fact that important additions have been made to the plans for conducting Walla Walla College the coming year, has led to the preparation of this announcement supplementing the Annual Calendar.

SPECIAL COURSE FOR CHRISTIAN WORKERS.

This course is especially intended for those who can spend but a short time in school work, such as ministers, Bible workers, and those engaged in the sale of subscription books. It will begin Wednesday, Nov. 26, 1902, and will continue twenty-four weeks, ending with the close of school; Tuesday, May 12, 1903. The course of studies adopted by the Board Trustees for the coming year, is as follows:

FIRST TERM—TWELVE WEEKS.

PRESENT TRUTH.—Embracing the Faith and Doctrines of the Seventh-day Adventists.

ENGLISH LANGUAGE.—The Essentials of English Grammar will be

combined with Composition and Letter-writing.

PHYSIOLOGY AND HYGIENE.—The fundamental principles of the subject as a foundation for Simple Treatments and Christian-Help work during the second term.

GOSPEL METHODS.—General instruction in Sabbath-School work, two weeks; Bible readings, four weeks; Church organization, two weeks; Home and Foreign work, two weeks; Manners and Etiquette, two weeks.

SECOND TERM—TWELVE WEEKS.

PRESENT TRUTH.—Subject continued.

ENGLISH LANGUAGE.—Subject continued.

ARITHMETIC.—Special subjects adapted to the needs of the class, How to keep simple accounts.

GOSPEL METHODS.—Simple Treatments, two weeks; Christian Help-work, two weeks; Work in New Fields, five weeks; Principles of Canvassing, and Questions and Answers, three weeks.

In all of these classes careful attention will be given to reading, writing and spelling.

Upon entering school each pupil will select a subscription book of the denomination, and will make it a subject of earnest reading and study with

a view of thoroughly mastering its contents.

It is expected that the leading ministers will be called in from the field for a few weeks at a time, to give the classes the benefit of their experience in methods of labor and Bible study.

GERMAN DEPARTMENT.

AT the Pendleton Camp Meeting, the fact was developed that half a dozen of our German young people were planning to go to Lincoln, Neb., to attend the German department of Union College. This led the trustees of the Walla Walla College to enquire, would it not be best to establish a German Department in connection with the College, so that these and other German young people could be educated at home and prepared for labor in our own field? At a meeting of the Board a few days later, this matter was further considered, and it was decided that, if, at the Endicott camp meeting, a sufficient number of students should promise to attend such a department, it would be opened. At the meeting in question about a dozen young people made this promise, and the Board of Trustees have accordingly decided to start a German department with Eld. N. J. Schnepper as teacher.

In this department the following studies will be taken up in German the coming year:

Reading, Writing, and Spelling, according to the needs of the pupils.

Beginning German for English students, to acquire a vocabulary, and to enable them to read and speak Ger-

man as well as may be done in one year.

German grammar for German students who have not made the grammar a study, and for English students in their second year's work.

Rhetoric for advanced students who have finished the course in German grammar.

Bible study, covering the same ground as that pursued by the English class in Present Truth.

General History, covering an outline of the world's history, with a good German text-book for study.

It has been found in other colleges where German departments have been adopted, that the foregoing studies meet the wants of our German laborers, and that they prefer to pursue their other studies in the regular classes of the English department.

As we find that our German students will, the most of them, be unable to enter school the first month, it has been decided to delay the opening of the German department until Wednesday, Oct. 1st. On that date it is expected that every student who desires to enter this department, shall be present for classification, and it is hoped that no one will put off coming until a later date, because it will be very inconvenient for anyone to enter the classes after they have begun their regular work. The German class for English students will begin at the opening of school, September 3rd.

And now we appeal to our German brethren to work for this new department of the school in which they are so much interested. Let them extend the announcement as widely as possi-

ble and influence worthy young people to enter the school. We desire to make this a permanent department of the College, if this year's work proves that there is a sufficient demand for it. Will not our German brethren and sisters rally to the support of this effort so vital to the interests of the German work in the Northwest, and shall we not have their hearty support by their sympathies, their prayers and their patronage, that the German department at Walla Walla College may be the means of raising up laborers for the German work in the Northwest.

MEDICAL MISSIONARY DEP'T.

FOR some time the College has maintained a department for giving one year's instruction in nursing, and has requested our sanitariums to allow this instruction to count on their regular Nurses' Course; but this plan has not proved wholly satisfactory to either the College or the Sanitariums.

At the same time the Board could not overlook the passage on page 136, Vol. 6 of "The Testimonies," which states that, "In our schools, missionary nurses should receive lessons from well qualified physicians, and, as a part of their education, should learn how to battle with disease and to show the value of Nature's remedies. This work is greatly needed;" and they have felt that all but a few professional subjects, heretofore given in the Nurses Course, should enter into the educational work of our College, to prepare laborers for the missionary field. Hence, it has been decided to re-organize the work on a broader

basis, which will avoid the professional objection, and will make the department of greater value to the school and to the cause. Hence, the Nurses' Course as outlined on page 43 of the Calendar will be discontinued.

This department will hereafter be known as "The Medical Missionary Department," and will be conducted by Dr. I. A. Dunlap, the College physician. Its work will be grouped about four subjects, each of which will require a years' work, except Physical Culture, which will be taken by all of the students in addition to their regular work. These subjects may be described as follows:

ELEMENTARY SCIENCE.

This subject will embrace a half year's study of Elementary Anatomy, Physiology and Hygiene, and a half year's drill in Elementary Science, required by our Sanitariums to enter the regular Nurses' class. There will also be instruction given in Cooking, Accidents and Emergencies, and Simple Treatments. This work will meet the requirements for science in the seventh grade, found on page 44 of the Calendar, and will entitle anyone who satisfactorily completes the eighth grade, to receive a certificate which will admit him, so far as scholarship is concerned, to the regular Nurses' course at any of our Sanitariums.

ADVANCED PHYSIOLOGY.

This work will embrace all that is required under the head of "Physiology" in the Freshman and Second Preparatory years of the Scientific and Literary courses, found on page 42 of the Calendar. In connection with it there will also be opportunity for in-

struction in Practical Nursing, Elements of Hydrotherapy, and Simple Treatments, such as every person ought to know.

PHYSICAL CULTURE.

Upon entering permanently upon his school work, every student will receive a careful physical examination from the College physician, and record will be made of his condition. Instructions will be given in Physical Culture and improvement of health, and care will be taken to see that he does not endanger his health by too many studies. This examination will include the eyes, and if glasses are needed they will be supplied at reasonable rates. The gymnasium will be under the direction of the physician and will be so conducted as to give an opportunity for all to remedy their physical defects and preserve their health as far as may be done through the gymnasium work.

CHRISTIAN HELP WORK.

This class is designed for Ministers, Bible workers, Church-school teachers and others who expect to engage in public effort in connection with some department of Gospel work. It will consist of practical instruction in Hydrotherapy, Diseases and their Treatments, Accidents and Emergencies, Sanitary Science, and Methods of Christian Help work.

Upon comparing the foregoing outline with the description of the Medical Missionary Department on pages 35 to 37 of the Calendar, it will be seen that all that is there recorded is still applicable, except the last sentence of paragraph 1 page 36; also the last sentence of paragraph 1 page 37,

which must not be interpreted to mean that College students will be received into the second year of the Nurses' course. In other words, while the College will still prepare students for the Medical and Missionary courses, it will not longer give professional instruction to nurses. On the other hand, we believe that the broadening of the field by placing the Medical Missionary work in all of the regular courses of study and by introducing Physical Culture and extending it to every student in the school, will render the work more practical and beneficial than formerly; will promote harmony by leaving the professional work to the Sanitariums where it properly belongs, and will result in blessing to the Cause by making Christian Help work hereafter an essential part of the training of all laborers educated at the College.

INDUSTRIAL DEPARTMENT.

At the last annual meeting of the Board, much attention was given to the subject of "The Industrial Department;" and plans were laid for improving this branch of work. At a recent Board meeting these plans were sufficiently perfected to warrant an announcement concerning this department of the school.

In the past, farming, gardening, fruit-raising, dairying, blacksmithing, broom-making, baking, printing, cooking and housekeeping, have been in successful operation, and students of the Home have performed from one to three hours work each day in these departments. But little systematic instruction has been given, except

what would naturally come to the students while engaged in their work, and almost nothing has been done for the students who live outside of the school home.

At a recent meeting of the Board they decided that the industries already in operation should be continued and improved, and that carpentry and tent-making should be added. They also decided that just as soon as suitable persons can be found to take charge of other industries, such as dress-making, tailoring, painting, and shoemaking, these departments should be opened. It may be in order here to request if any know of persons who are skillful and apt to teach in these branches of work, and who desire to spend two or three years in school, or have children to educate, that they should put the Business Manager in communication with these persons.

It has also been decided to introduce as many industrial studies as the Faculty can carry on successfully, holding recitations twice each week, and giving a full hour to each recitation. These classes will be held at a time when the resident, as well as the Home students, can take part in them. Each pupil in school will be encouraged to take one industrial study, and each teacher will be expected to engage in teaching at least one industrial class. These classes will all be held at the same hour and will not interfere with any regular study. No tuition will be charged to students who have regular work besides. The tuition to those who may want to take the industrial studies alone, will be 75 cents per month for each study.

The class period will be devoted to

recitations and discussions concerning different industries, and as thorough preparation will be required from textbooks and other sources as is required for other studies. Whenever possible, teachers will take their classes where they can see the industries in operation in order thus to demonstrate the lessons.

Resident students will obtain their practical experience in their own homes in the different kinds of work, but Home students will get theirs in the various industrial departments of the College, as they have done in the past, in harmony with announcements already made in the Calendar.

According to these plans it is expected that industrial classes will be started the coming year in the following subjects: Gardening, Fruit-raising, Dairying, Poultry-keeping, Farming, Floriculture, Printing, Housekeeping, Cooking, Baking, Blacksmithing, Beekeeping, Sewing and Dress-making and Broom-making.

NORMAL DEPARTMENT.

ABOUT a year ago Prof. Lewis was chosen to act as Educational Secretary for the Northwestern Union Conferences. In this capacity he attended the camp meetings in this Conference last summer, and gave special attention to the Church-school work. That he might better carry forward this work, he prepared "A Manual for Home and Church Schools," which has been recommended by the Educational committee of the General Conference, published by the Review and Herald, and adopted by the Northern,

Central and Southwestern Union Conferences.

While engaged in this work he became convinced that the Normal Departments of our training schools are the key to the Church-school situation, and the arrangements were nearly completed for him to take charge of the Normal Department of Union College when he was called to the Presidency of the Walla Walla College. He now desires to do for the Church-school work in the Northwest what he expected to do if he had remained in his former position. The Normal Department will, therefore, be re-organized, and the most of his teaching will be done in that department.

Vol. 6 of "The Testimonies," page 200-204, we read that, "In selecting teachers we should use every precaution, knowing that this is as solemn a matter as selecting persons for the ministry. * * * * Any person of an inferior or narrow cast of mind should not be placed in charge of these schools. Do not place over the children, teachers who have no managing ability, for their efforts will tend to disorganization. * * * * They should have the true missionary spirit for the children are to be trained to become missionaries."

With this high standard before us, it is plain that the quality of our teaching force must be improved, and its members increased. Men spend long years in study to learn how to treat the body, should they with unseemly haste rush forward without preparation to direct the development of the soul?

Nor is a simple study of the sub-

jects to be taught all that is needed; multitudes have this knowledge. It is the knowledge of the Philosophy of Education, of the Principles of Christian Education, of the best Methods of Teaching, of the Principles and Art of Governing. It is a knowledge of these subjects that is lacking, and teachers must supply the deficiency; they must be students constantly, and the Normal Department of Walla Walla College should furnish them an opportunity to make this improvement.

We are told on page 203, Vol. 6 of "The Testimonies," that our Church schools are ordained by God, to prepare children for the great work of making the final proclamation of the Truth, when the way before the older workers is hedged up. In these schools the children are to be instructed in the special truths for this time and in practical missionary work, and for this reason the church is exhorted to carry a burden for "The lambs of the flock." "Let the children be trained and educated to service for God, for they are the Lord's heritage." There have been conducted in the territory of Walla Walla College, about a dozen or fifteen Church-schools, when there should have been one hundred, for we are told that wherever there is a company of Sabbath keepers, there should be established a Church-school, and that the school room is needed just as much as the church building.

This shows that we have only just begun this Church-school work. We shall need more than one hundred Church-school teachers in the Northwest. It is a modest call, therefore,

which we make when we ask the people in this school district to send to us next fall, fifty young men and women who have consecrated their lives to the Church-school work, and who desire to enter the College to prepare themselves for their noble calling. We hope that our young people will realize that the spirit of the Lord is calling them to engage in this neglected field and that our churches will arise from the sleep into which the Spirit has said we have fallen concerning the importance of this question.

Besides the usual subjects which teachers need to pursue in order to be fitted for their work, classes will be organized in Mental Science and its application to teaching in the history of education, in the principles of Christian education, and in school management, as the needs of the students may demand.

It is the purpose of the College with the co-operation of the College Place church to organize a model Church-school in which the pupil teachers may observe the operation of the principles they are studying in their regular classes.

By the blessing of God it is hoped that the Normal Department will be able to train Church-school teachers to meet the large demand for teachers that must be met in the near future.

EDUCATIONAL MEETINGS.

Providence permitting, I will meet with the churches in Oregon, Washington and Montana, as appointed below.

Whenever Sabbath meetings are

held, I shall be glad to have the brethren and sisters from the surrounding churches attend, as far as possible. The object of these meetings is to set forth the principles of Christian education, and the importance of the Church-school work. The work of the Walla Walla College and the relation which it sustains to the people in the Northwest, will also receive attention, and there will be opportunity for consultation by parents who are thinking of placing their children in some good Christian school where they will receive the instruction demanded for this time.

Will the Elders or leaders of these churches kindly arrange for time and place of meetings, and do all they can to extend the notice so there may be as large an attendance as possible?

THE foregoing announcement concerning some of the special features of the College work for the coming year, is designed to answer many queries that might be in the minds of some. In case the information given is not clear and plain, the College will be glad to answer any questions that might arise with reference to its work the coming year. Address Prof. C. C. Lewis, or Walla Walla College, College Place, Wash.

ARE *you* planning to be in school the coming winter? If not, we want your name and address. The coming year may be the one you ought not to miss. Come September 3rd and do not wait a year or so longer. That may be too long. Who knows? Have you ever thought about Church-school Work, Medical Missionary Work, a Commercial Training? Send for a calendar, read it carefully, act wisely and quickly and *come*.

IF there are any of our brethren who are raising broom corn, or know of those who are doing so, who will communicate this fact to the College, we shall consider it a favor.

THE College has a number of building lots for sale, which it would like to convert into cash. The lots are located near the College and with a small outlay can be made desirable dwelling places for those who wish to move here and place their children in the school. Information cheerfully and promptly furnished on application.

WANTED.—Several young men to work on the farm at the College, during the summer till school opens in the Fall. There will be considerable work to be done after school opens, which will give opportunity for a few to earn the larger part of their tuition by coming at once. Those who desire information, or who contemplate accepting our offer, please address Walla Walla College, College Place, Wash.
