

Bachelor of Business Administration

Concentration: Finance

2025-2026

General Areas of Service: Finance is a discipline at the heart of the business world. It is closely related to accounting and economics and opens a variety of different opportunities for its graduates. People may work in financial organizations, such as banks, insurance companies, mutual funds, real estate firms, brokerage houses, and pension funds. In addition, they could also work as financial managers in non-financial organizations (McDonald's, Microsoft, etc.), non-profit organizations (Red Cross, WWU, etc.), and government organizations. Finance jobs specialize in areas such as banking, investments, real estate, personal financial planning, insurance, currency exchange, pension and retirement planning, valuation of businesses, demand forecasting, cash, receivables, & inventory management, capital budgeting, etc.

Professional Training: Because finance is such a broad discipline with an infinite diversity of job descriptions, it is hard to specify typical professional training. However, a four-year degree in business with a finance concentration is a good starting point for anyone wishing to enter this field. Many finance professionals also seek certification, such as the CFA (Certified Financial Analyst) or the CFM (Certified Financial Manager).

Job Outlook: The U.S. Bureau of Labor Statistics (BLS) projected to grow 8 percent from 2022 to 2032, faster than the average for all occupations. (See www.bls.gov)

Earnings: The U.S. Bureau of Labor Statistics reports a median annual pay for financial analysts of \$101,350 as of May 2024. (See www.bls.gov)
