

Bachelor of Business Administration Concentration: Accounting 2025-2026

General Areas of Service: Many career options exist in accounting. Public accountants have their own businesses or work for public accounting firms. They perform a broad range of accounting, auditing, fraud investigation, tax, and consulting activities for their clientele, which could include corporations, governments, nonprofit organizations, or individuals. Accountants also work in corporations, nonprofits, and governments. Positions include treasurer, financial analyst, budgeting, business manager, controller, CFO, FBI agent, IRS auditor, etc.

Education/Training: Most large public accounting firms, businesses, and governmental agencies require applicants to have at least a bachelor's degree in accounting. Preference is commonly given in all career positions to Certified Public Accountants (CPAs) or Certified Management Accountants (CMAs). A majority of states now require 225-quarter hours of college credit in order to take the CPA Exam. These extra credits can be taken at the undergraduate or graduate level. A master's degree is a desirable added qualification in all areas. WWU students earn their initial accounting experience through a required accounting internship.

Denominational Opportunities: A wide variety of positions in accounting, auditing, and financial management are open in church organizations, such as in healthcare, publishing, academies, and universities in North America and overseas.

Job Outlook: According to the *Job Outlook* survey by the National Association of Colleges and Employers, accounting is one of the highest college majors in demand by employers. The U.S. Bureau of Labor Statistics projects growth of employment for accountants and auditor is projected to grow 4 percent from 2022 to 2032, about as fast as the average for all occupations. (See www.bls.gov).

Earnings: According to the U.S. Bureau of Labor Statistics, the average pay range was \$53,000 to more than \$141,000 for accountants and auditors in May 2024. Accountants with CPA certifications can earn substantially more. (See www.bls.gov).
