

Business Administration Major Bachelor of Arts 2025-2026

General Areas of Service: A Bachelor of Arts degree with a major in business administration is a flexible, broadly-based degree ideal for those students who want solid preparation, along with a non-business minor and foreign language study. Many pre-professional students (pre-medicine, pre-dentistry, etc.) find this degree especially attractive because they obtain not only a solid background in business but are also able to meet the prerequisites of professional schools. Other students who want business training may wish to get a minor in another area that interests them, such as health, history, communications, etc.

Professional Training: This degree prepares students for entry into the business world or graduate study. It also offers students a liberal education in the concepts and skills useful for decision-making in organizations.

Job Outlook and Earnings: The variety of positions available with this degree is so vast that it is difficult to predict the average job outlook or earning potential. Nevertheless, the average salary and employment rates are substantially higher for those with bachelor degrees than for those who only hold a high school diploma.
